Move the sign to unlock, show as below.

Drag this to unlock the screen and enter the application interface.

#### 1-6 Homepage information columns

Google shortcut key Menu shortcut key

Back Home interface Recent search

#### 1-7 Text input

When use the tablet, you can use the virtual keyboard to enter text, numbers, symbols directly by touching screen. After selecting the Android input method, the default keyboard show as below.

To switch the numbers and letters, please press this

To switch the capital and lowercase letter, please press this

Chapter two: Internet

#### 2-1 Browser

Require network support before using a web browser, if there are network supporting problems, please contact your network operator or the service provider.

Tablet's web browser can connect to the Internet via WIFI to satisfy your business and individual network needs.

Please touch to set up the WIFI so that can use the browser normally. See as picture:

Touch here in the application list to enter the browser pages;the default homepage is the <Recently Viewed> showing recently viewed pages.

Browser supports the following features

Move Back Refresh

Input area

Add bookmarks Search Bookmarks

Enter the URL-touch the input area to get the soft keyboard,then text the UPL.

Book mark search-click this to add into the bookmark

Touch this to read the favorite website that collected

Touch this to search the internet

Touch this to add new browser

Touch this to close the browser

Chapter three:Application

3-1 Camera

Touch this in the application list to enter the camera,the views showed on the screen and you can do the following sa picture:

Camera

Click this to get Snap shot.

setting": to set up white balance,exposure,save,start.

Video

Click this to video and do the relevant operation.

Setting": white balance setting, delay,save,click this to start video

View photos and videos

In pictures preview interface,click on the screen to preview photos,also you can set up the pictures to slides.

3-2 photos

Information

### 3-4 Music

Touch here to the music player.Music can be played by artists or album classification.

This page displays the songs alphabetically.

Click the songs you want to listen and get into selected state to play.

Click on the <now playing> will display being played album page;there will be lyrics shows under the page right.

Play interface:list,random play,repeat

Artists

In the<artist> page,it is sorted according to the artist's initials,click on one,you will open the artist's related album and song list;then you can click songs to play.

Album

The album page shows all albums in the list,sliding it can browse all.Click on the album cover will transfer to the album back automatically.When all music shows,click again on the songs began to play.

### 3-5 Calendar

Touch this to Calendar,the default page shows the months,click this to the day.

Date views:long press to the events to rebuilt,view,edit,and delete;Click on the blank area can set up new events;long press the blank area,you can built new events or display/not display the lunar day view.

Week views:Long presses the event to rebuilt,view,edit,and delete events;long press the blank area you can rebuild events or display/not display the lunar weeks view.

Month view:long press date to build new calendar items or display/not display the lunar month view.

Agenda:list all events click to read the details.

In any views,when you switch to other date,week or month,all can be back to today or week or month now by touching <today> button.

Click here in the application list which including all the pictures.

Click this can classify the pictures by time and place.Click this to enter the camera.

Click this to choose the album to edit delete.

Click this to enter slides show when you enter the album.

You can also click here to search task memo,edit,notation and share.

### 3-6 Calculator

Touch here in the application list to get into the calculator.

### 3-7 Document browsers

Touch here in the application list;it supports the files mutual copy in this two places internal memory and SD card.

Touch the button when it turn to yellow,you can edit the file.

Edit

Touch this to edit the file including cut/copy/paste/delete

Copy,choose one file in the list,click this to copy when show the

Then click this to choose where to put the file,and then click this to paste.

Delete,choose one file that click here to delete.

### 3-8 Application installation

Touch here in the application list,it will install,unload the APK files automatically.

It searches the APK file from or

Touch the selected APK application directly for installation and unloading

### 3-9 Video output

Touch here in the application list;choose the resolution of the video output.

System had 720P and 1080P two kind of resolutions.

### 3-10 Simulation Game

In the application list click here to connect the handle to the game,there will be AC,PS,MD, GBA,FC APK file in the Motin Game.

Different equipment installs different simulator

Handle

:Space,:back,:select,:start

Different keys set different in the game

### 3-11 Downloads

Click here in the application list;you can preview the downloading or done document contents.

Click download file to stop or delete the download contents.

### 3-12 E-mail

Require the internet support before using e-mail,if there are problems in network supporting;pleade contact your network operator.

Add account

If you are the first time to use email,get into a mailbox interface directly to set up an account according to instruction.

If you want to add more mailboxes,click <Settings> on the top of the page to add more mailboxes, and then select <add account>.

## Email account

You can set up email for most accounts in just a few steps.

Email address \_\_\_\_\_

## Draft e-mail

In <inbox> page,you can click this on the right page top to draft mail quickly.

In the draft mail page,you can:

Add mail recipients quickly.

Enter the recipient address in recipient input box or click on the <contact> in the contact list of recipients to choose mail address;you can copy/close to send input address.

Write email subject and text content(the text area support copy,share operation);

Add attachment

Add attachments form the document management,when it succeeds,the name will show one<New e-mail> page;you can click to select to open or remove them.

## Chapter four: System setting

Click here to enter the system setting interface.

### 4-1 Sound setting

Sound settings,click this to sound setting page.You can choose mute switch which can get more detailed settings if you need.Click the<volume setting> can set up the notice,the media and the alarm of volume and choose the prompt operation sound and the bell and software disk boot switch voice.

### 4-2 Internet setting

This setting module includes:the wireless local area network Settings

The wireless local area network Settings

Open wireless LAN switches,the system will scan available wireless network automatically and display the wireless local area network in the list.

Among them,if the local area networks have the sign behind it,that represents the networks don't need a password,can be connected directly.

This sign represents the network has been encryption,it needs to enter the password to connection.

You can choose the network from the list you want,click it to connect directly,also you can click the<advanced>option to set up the<IP>and<agent>,then click <connected to the network>; you can also select <add wireless localarea network>,to add by hand.

Network notice:open the switch,it will notice if there any open network.

The wireless local area network certificate:the wireless local area network loading and management.

MAC address:to show the MAC address

### 4-3 Display setting

Display Settings contains:wallpaper Settings,dormancy time,brightness,automatic rotating Settings

Wallpaper setting

In the wallpaper setting,you can set up the wall paper and dynamic wallpaper;the wallpaper can be chosen from gallery.

#### Standby Screen

When the screens in light state a period of time,it will automatically lock to save the power if without any operations.

#### Brightness

The user can adjust brightness manually to get the lightness you want.

#### Font size

You can set up the font size according to individual's favorite,there were respectively:small, ordinary,big,huge.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

### Specific Absorption Rate (SAR) Information

Your wireless mobile device is a radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for Radio Frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These FCC RF exposure limits are derived from the recommendations of two expert organizations: the National Council on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE). In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy. The RF exposure limit set by the FCC for wireless mobile devices employs a unit of measurement known as the Specific Absorption Rate (SAR). The SAR is a measure of the rate of absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC requires wireless devices to comply with a safety limit of 1.6 watts per kilogram (1.6 W/kg).

The FCC SAR limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements. SAR tests are conducted using standard operating positions accepted by the FCC with the mobile device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the mobile device while operating can be well below the maximum reported value. This is because the mobile device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the mobile device.

Use of other accessories may not ensure compliance with FCC RF exposure guidelines. The FCC has granted an Equipment Authorization for this mobile device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. To comply with RF exposure requirements, a minimum separation distance of 0.0 cm must be maintained between the user's body and the handset, including the antenna.
